PROJECT A

- Art is for all -

Project A – Art is For All - All of you, all skill levels, all the time.

Young Friends of the Academy (YF) is an arts education and audience development programme of The Hong Kong Academy for Performing Arts (HKAPA) targeting secondary school students. This year YF has launched a brand new "Project A" so that you can enjoy a journey through performing arts on your couch during the "summer break."

From 16 to 25 Mar, we have prepared different activities for our Young Friends' members and their friends to participate. These activities can be divided into two categories:

1. Online Programmes

If you love watching shows online, we have gathered various programmes from the six Schools of the Academy, e.g. well-praised Academy productions, engaging expert talks, and inspiring alumni radio interviews, etc. so that you'll know more about different areas in performing arts.

2. Online Workshops

For those looking for fun and stimulating activities, we have interesting online workshops to relax your mind and body and also get your creative juices flowing, e.g. body stretching with Yoga and art jamming. Not to mention that it's a great chance to meet like-minded friends too!

We are pleased to boost 100% satisfaction guaranteed!

"I love the art jamming workshop and I got to choose my favourite songs to listen!"

"Enjoyed the time with art!"

"Hope to see more similar activities in future!"

If you have missed any of our online programmes, you don't need to worry because all our programmes are available online for you to enjoy at your own time again and again.

Coming soon - Live Industry and Expert Talks

But wait! Our journey doesn't stop here. If you are serious about developing a career in performing arts and knowing what's the latest trends in the performing art industry, you can't miss our live talks delivered by experts and industry professionals. Stay tuned for our updates!

All are free of charge. Join us to discover the artist in you!
